

DAVID ANTHONY BAILEY

Current Position

Associate Scientist IV, National Center for Atmospheric Research

Education

Ph.D. 2001: Astrophysical, Planetary, and Atmospheric Sciences / Program in Atmospheric and Oceanic Sciences, University of Colorado, Boulder, CO. (Advisor: Amanda H. Lynch)

M.Sc. 1993: Oceanography/Applied Mathematics, University of British Columbia, Vancouver, B.C. (Advisor: William W. Hsieh)

B.Math. 1991: Applied Mathematics/Computer Science Minor, University of Waterloo, Waterloo, Ontario.

Management and Service Experience

2017 – present: Supervised an Associate Scientist, Alice DuVivier.

2017 – present: Served on the Model Component Liaison committee for the Earth System Prediction Capability project (NOAA).

2016 – present: Led the Community Aspects Task Team for the CICE Consortium and participated in a number of the other task teams.

2016 – present: Served on PhD committee for Abigail Ahlert at University of Colorado.

2006 – present: Served as the Community Liaison for the Polar Climate Working Group of the CESM.

2015 – 2016: Organized the CGD Seminar.

2012, 2017: Led the CESM Tutorial.

2011 – 2015: Served as chair of the ACADIS Data Advisory Committee.

Research Experience

Associate Scientist, National Center for Atmospheric Research (2006 - present):

- investigated high-resolution CESM experiments to assess sea ice and high-latitude aspects
- validated model simulations against satellite and other observational products
- responsible for the maintenance and development of the CESM sea ice model component (CICE)
- perform experiments of interest to the CESM Polar Climate Working Group and greater CESM community
- study impact of physical parameterizations on the simulation of sea ice and the coupled climate system
- collaborated with numerous PCWG and CESM scientists

Research Scientist, George Mason University / Center for Ocean Land Atmosphere Studies (2004 - 2005):

- contributed to the development of the Poseidon hybrid-coordinate ocean model
- assessed the skill of tropical Pacific upper-ocean temperature simulation in nearly-global medium resolution experiments using the Poseidon ocean model
- studied the conservation of dense overflow water in a high resolution global Poseidon simulation

Postdoctoral Research Associate, University of Washington (2000 - 2003):

- analyzed a coupled ice-ocean model of the Arctic and North Atlantic Oceans
- studied atmospheric and oceanic variability and mechanisms behind the variability

Graduate Research Assistant, University of Colorado (1996 - 2000):

- implemented a regional climate system model for the Antarctic and Southern Ocean
- investigated the model sensitivity and applicability to study Antarctic climate
- studied the role of coastal atmospheric and oceanic processes in driving an open-ocean polynya
- participant in North Water Polynya project, Ellesmere Island, Canada (1998):
 - recorded regular weather and cloud observations
 - sampled snow and sea ice properties

Ph.D. Candidate, University of Tasmania, Australia (1996):

- continued research on Western Arctic and Alaskan regional climate simulations

Research Programmer, Geophysical Institute, University of Alaska (1993 - 1996):

- maintained and developed the Arctic Region Climate System Model (ARCSyM)
- investigated the atmospheric forcing of the St. Lawrence Island polynya
- researched climate system model sensitivity in the Western Arctic and Alaska regions
- cooperated with Fairbanks National Weather service office on the implementation of NCAR MM5 operational weather forecasting and assimilation model
- performed UNIX system administration

Graduate Research Assistant, University of British Columbia (1991 - 1993):

- researched the use of a regional ocean model in a data assimilation scheme

Co-op Student, Canadian Ice Service, Environment Canada (1990, 1991)

- maintained and developed an operational model for sea ice forecasting
- incorporated satellite and aircraft observations for model validation

Technical Skills

- Extensive experience with Fortran 77/90/95.
- Programming in massively parallel environments.
- Familiarity with MPI/OpenMP parallelization.
- Very proficient in analysis/visualization tools such as NCL, Matlab, and IDL.
- Experienced in LINUX/UNIX environments and shell/perl programming.
